Project Designer:
CK Low, Regina Chen, Roystern Goh

Project Location:
Singapore

Site Area:
1,098 sq. ft.

This project is a 3-bedroom condo show flat intended for a family of 4 – a pair of young professionals and their preschool children.

Conceived during the time of Covid-19 when quarantines were in place, the apartment was designed to help foster closer ties within the family while giving each person the space they need to work, play and grow as an individual. We referred to studies on the effects of staying at home among people during the pandemic and gained insights for our design exploration.

The shared spaces have an open plan for lounging, eating and working. Aside from creating a seamless area, this layout allows parents to keep an eye on their young ones at all times for peace of mind. Quiet places were also catered, a coffee nook carved into the back of the unit provides a quick getaway from the chaos of the family.

CHENGDU POLY LIGHT IN CITY SHOW FLAT

Company Name:
C&C DESIGN CO., LTD.

Project Designer:
彭征、曾慶豪、楊亞會

Project Location:
China

Site Area:
1,356 sq. ft.

The project is located in Chengdu, Sichuan Province. Coherent design in the world is few, but the coherent space experience isn't difficult to have. Air flows into interior, swinging and sinking at the twists and turns, flickering and echoing at the wide space. We try to make the curves of construction and the meanders of boundary, by hiding, folding, compromising, surrounding and protecting, then an open space with breathing sense is built. Under the neutral character in black, white and grey, we give life with rhythm of loose and tight.

This case through insight into the hearts of contemporary 90women open-minded and brave, express the spirit of a new generation of women style, in their own small world, listening to the years, gentle and free. Marble and metal texture collision, just reflects the space elegance and quality. Drawing light into the room, through the flow of light and shadow, in the horizontal extension to open a scene and the interaction of the shadow. Here, when different spaces are connected with each other, the multi-function hall can be switched freely, bringing people a different living experience

MOSHANG QISHAN COURT

Company Name:
OPS DESIGN

Project Designers:
**Huajin Ye, Xiang Pan, Yunsha Lu,
Yeke Liao**

Project Location:
China

Site Area:
2,325 sq. ft.

The project is located in Fengning Manchu Autonomous County, in the middle zone between the farming culture of the Central Plains in the south and the animal husbandry culture in the north. Under the creation of design, the beauty of the full spectrum created by nature can be traced. An initial moving evolved into a spatial work. Every centimeter of color, pattern and texture in the space is poured into the designer's smart language, carefully selected art and design, so that objects can form an interesting dialogue of harmony or conflict with each other.

Project Location:
China

Site Area:
1,830 sq. ft.

The project is located in Fengning Manchu Autonomous County. Fengning is a fusion of many ethnic groups, where various ethnic groups evolve and thrive. It has a collection-level urban gene. The designer fully integrates his own aesthetics of space into each object, and the presentation of each beauty combines national beliefs, exotic customs and ingenious applications of various styles, traditional crafts, fabrics and patterns. Let beauty surround this place of the heart. Creating balance and flow between the different elements is like the moderation of differences in nature.
